CONSORT-EHEALTH (V 1.6.1) - Submission/Publication Form

The CONSORT-EHEALTH checklist is intended for authors of randomized trials evaluating webbased and Internet-based applications/interventions, including mobile interventions, electronic games (incl multiplayer games), social media, certain telehealth applications, and other interactive and/or networked electronic applications. Some of the items (e.g. all subitems under item 5 - description of the intervention) may also be applicable for other study designs.

The goal of the CONSORT EHEALTH checklist and guideline is to be

- a) a guide for reporting for authors of RCTs,
- b) to form a basis for appraisal of an ehealth trial (in terms of validity)

CONSORT-EHEALTH items/subitems are MANDATORY reporting items for studies published in the Journal of Medical Internet Research and other journals / scientific societies endorsing the checklist.

Items numbered 1., 2., 3., 4a., 4b etc are original CONSORT or CONSORT-NPT (non-pharmacologic treatment) items.

Items with Roman numerals (i., ii, iii, iv etc.) are CONSORT-EHEALTH extensions/clarifications.

As the CONSORT-EHEALTH checklist is still considered in a formative stage, we would ask that you also RATE ON A SCALE OF 1-5 how important/useful you feel each item is FOR THE PURPOSE OF THE CHECKLIST and reporting guideline (optional).

Mandatory reporting items are marked with a red *.

In the textboxes, either copy & paste the relevant sections from your manuscript into this form - please include any quotes from your manuscript in QUOTATION MARKS,

or answer directly by providing additional information not in the manuscript, or elaborating on why the item was not relevant for this study.

YOUR ANSWERS WILL BE PUBLISHED AS A SUPPLEMENTARY FILE TO YOUR PUBLICATION IN JMIR AND ARE CONSIDERED PART OF YOUR PUBLICATION (IF ACCEPTED).

Please fill in these questions diligently. Information will not be copyedited, so please use proper spelling and grammar, use correct capitalization, and avoid abbreviations.

DO NOT FORGET TO SAVE AS PDF _AND_ CLICK THE SUBMIT BUTTON SO YOUR ANSWERS ARE IN OUR DATABASE !!!

Citation Suggestion (if you append the pdf as Appendix we suggest to cite this paper in the caption):

ABSTRACT
entification as a randomized trial in the title
address CONSORT item 1a? * n the phrase "Randomized Controlled Trial"? (if not, explain the reason under "other")
de of delivery in the title divery. Preferably use "web-based" and/or "mobile" and/or "electronic game" in the terms like "online", "virtual", "interactive". Use "Internet-based" only if Intervention d Internet components (e.g. email), use "computer-based" or "electronic" only if ed. Use "virtual" only in the context of "virtual reality" (3-D worlds). Use "online" only e support groups". Complement or substitute product names with broader terms for such as "mobile" or "smart phone" instead of "iphone"), especially if the application rms.
1 2 3 4 5
1 2 3 4 3

Yes, "Web-Based E-Learning Platform for Brief Motivational Interviewing".
1a-ii) Non-web-based components or important co-interventions in title
Mention non-web-based components or important co-interventions in title, if any (e.g., "with telephone
support").

	/

1b) ABSTRACT: Structured summary of trial design, methods, results, and conclusions

NPT extension: Description of experimental treatment, comparator, care providers, centers, and blinding status.

1b-i) Key features/functionalities/components of the intervention and comparator in the METHODS section of the ABSTRACT

Mention key features/functionalities/components of the intervention and comparator in the abstract. If possible, also mention theories and principles used for designing the site. Keep in mind the needs of systematic reviewers and indexers by including important synonyms. (Note: Only report in the abstract what the main paper is reporting. If this information is missing from the main body of text, consider adding it)

1 2 3 4 5

subitem not at all important \bigcirc \bigcirc \bigcirc \bigcirc essential

Does your paper address subitem 1b-i? *

Copy and paste relevant sections from the manuscript abstract (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "MOTIV@CŒUR is a web-based e-learning platform in brief MI consisting of two 30 minutes sessions covering 4 clinical situations based on role modeling videos of nurse-patient interactions. An introduction to brief MI is followed by role playing based on real life clinical situations during which a nurse practitioner evaluates patients' motivation to change, and intervenes according to the principles of brief MI. The clinical situations target smoking, medication adherence, physical activity and diet".

1b-ii) Level of human involvement in the METHODS section of the ABSTRACT

Clarify the level of human involvement in the abstract, e.g., use phrases like "fully automated" vs. "therapist/nurse/care provider/physician-assisted" (mention number and expertise of providers involved, if any). (Note: Only report in the abstract what the main paper is reporting. If this information is missing from the main body of text, consider adding it)

Copy and paste relevant sections from the manuscript abstract (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "Nurses were asked to complete both training sessions online asynchronously within ≤ 20 days to assess the feasibility of the intervention".	

1b-iii) Open vs. closed, web-based (self-assessment) vs. face-to-face assessments in the METHODS section of the ABSTRACT

Mention how participants were recruited (online vs. offline), e.g., from an open access website or from a clinic or a closed online user group (closed usergroup trial), and clarify if this was a purely web-based trial, or there were face-to-face components (as part of the intervention or for assessment). Clearly say if outcomes were self-assessed through questionnaires (as common in web-based trials). Note: In traditional offline trials, an open trial (open-label trial) is a type of clinical trial in which both the researchers and participants know which treatment is being administered. To avoid confusion, use "blinded" or "unblinded" to indicated the level of blinding instead of "open", as "open" in web-based trials usually refers to "open access" (i.e. participants can self-enrol). (Note: Only report in the abstract what the main paper is reporting. If this information is missing from the main body of text, consider adding it)

Yes, "The implementation of a web-based e-learning platform for brief MI is both feasible and acceptable among cardiovascular care nurses".

INTRODUCTION

2a) In INTRODUCTION: Scientific background and explanation of rationale

2a-i) Problem and the type of system/solution

Describe the problem and the type of system/solution that is object of the study: intended as stand-alone intervention vs. incorporated in broader health care program? Intended for a particular patient population? Goals of the intervention, e.g., being more cost-effective to other interventions, replace or complement other solutions? (Note: Details about the intervention are provided in "Methods" under 5)

1 2 3 4 5
subitem not at all important \(\cap \) \(\cap \) \(\cap \) essential

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

"While brief MI is promising, healthcare practitioners often lack time, basic training, or continuous education opportunities to update their knowledge and skills regarding increasing patients' motivation for change [18]."

"Therefore, in this study, we developed and pilot tested a web-based elearning platform for brief MI that included videos in which nurses could observe brief MI in a real-life clinical context".

2a-ii) Scientific background, rationale: What is known about the (type of) system

Scientific background, rationale: What is known about the (type of) system that is the object of the study (be sure to discuss the use of similar systems for other conditions/diagnoses, if appropiate), motivation for the study, i.e. what are the reasons for and what is the context for this specific study, from which stakeholder viewpoint is the study performed, potential impact of findings [2]. Briefly justify the choice of the comparator.

"Video-based e-learning showcasing clinical simulation has attracted strong interest from clinicians and researchers [23, 30-32]. Videos can facilitate knowledge acquisition and clinical skill development through pedagogical material that matches the reality of clinical settings [31, 33-35]".

"However, little is known about the educational effectiveness of brief MI training via a web-based e-learning platform".

2b) In INTRODUCTION: Specific objectives or hypotheses

Does your paper address CONSORT subitem 2b? *

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

brief MI (MOTIV@CŒUR) for cardiovascular nurses. The primary endpoint of the pilot study was the proportion of nurses who had completed both training sessions 20 days after the initiation of the training session.

The secondary objective was to assess the preliminary effect of MOTIV@CŒUR on nurses' perceived skill in, and self-reported clinical use of. brief MI".

METHODS

3a) Description of trial design (such as parallel, factorial) including allocation ratio

Does your paper address CONSORT subitem 3a? *

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "A single-group, pre-post pilot study involving cardiovascular nurses was conducted to assess MOTIV@CŒUR".

3b) Important changes to methods after trial commencement (such as eligibility criteria), with reasons

Does your paper address CONSORT subitem 3b? *

Yes, "No content or methodological modifications were made after study commencement".	
	ž.
3b-i) Bug fixes, Downtimes, Content Changes Bug fixes, Downtimes, Content Changes: ehealth systems are often dynamic schanges to methods therefore also includes important changes made on the during the trial (e.g., major bug fixes or changes in the functionality or content events" that may have influenced study design such as staff changes, system	intervention or comparator) (5-iii) and other "unexpected
subitem not at all important \(\cap \) \(\cap \) \(\cap \) essential	
Does your paper address subitem 3b-i? Yes, "Participants could log into the e-learning platform from home or work via the device of their choice using their personal login credentials provided during the face-to-face encounter at the CCU. We suggested that participants change their passwords after the initial login. Passwords could also be reset via their personal email accounts if forgotten".

5-viii) Mode of delivery, features/functionalities/components of the intervention and comparator, and the theoretical framework

Describe mode of delivery, features/functionalities/components of the intervention and comparator, and the theoretical framework [6] used to design them (instructional strategy [1], behaviour change techniques, persuasive features, etc., see e.g., [7, 8] for terminology). This includes an in-depth description of the content (including where it is coming from and who developed it) [1]," whether [and how] it is tailored to individual circumstances and allows users to track their progress and receive feedback" [6]. This also includes a description of communication delivery channels and – if computer-mediated communication is a component – whether communication was synchronous or asynchronous [6]. It also includes information on presentation strategies [1], including page design principles, average amount of text on pages, presence of hyperlinks to other resources, etc. [1].

were also encouraged to practice brief MI techniques observed in the video in their regular clinical practice, if appropriate.

Nurses were asked to complete the second MOTIV@CŒUR session either at home or at the hospital, 2 weeks subsequent to S1. There was no computer constraint limiting completion of S2 earlier or later than this. However, in the context of this study, participants had to complete both sessions within 1 month".

5-x) Clarify the level of human involvement

Clarify the level of human involvement (care providers or health professionals, also technical assistance) in the e-intervention or as co-intervention (detail number and expertise of professionals involved, if any, as well as "type of assistance offered, the timing and frequency of the support, how it is initiated, and the medium by which the assistance is delivered". It may be necessary to distinguish between the level of human involvement required for the trial, and the level of human involvement required for a routine application outside of a RCT setting (discuss under item 21 – generalizability).

brief MI and self-reported clinical use of brief MI were compared using Student's t test for paired samples, with a 2-sided significance level of 0.05. We also performed a Student's t test for paired samples with the same parameters for the 4 subdimension scores for pre- and posttraining conviction and confidence. All statistical tests were two-sided and performed at a significance level of 0.05 using SPSS version 23.0. Basic assumptions, such as normal distribution, were verified prior to analyses".

12a-i) Imputation techniques to deal with attrition / missing values

Imputation techniques to deal with attrition / missing values: Not all participants will use the intervention/comparator as intended and attrition is typically high in ehealth trials. Specify how participants who did not use the application or dropped out from the trial were treated in the statistical analysis (a complete case analysis is strongly discouraged, and simple imputation techniques such as LOCF may also be problematic [4]).

or 31 (77%, 95% confidence interval = 63%, 92%) completed both training sessions within the 20-day period following initiation of S1. This was close to the criterion for determining success (i.e., 80%). Two other nurses completed S2 within 26 and 30 days of S1. In addition, 28 and 26 participants had completed S1 and S2, respectively, at 30 days".

However, since this was a pilot study, there was not enough power for most results to be statistically significant in regard to skills and clinical use of brief MI.

17a-i) Presentation of process outcomes such as metrics of use and intensity of use

In addition to primary/secondary (clinical) outcomes, the presentation of process outcomes such as metrics of use and intensity of use (dose, exposure) and their operational definitions is critical. This does not only refer to metrics of attrition (13-b) (often a binary variable), but also to more continuous exposure metrics such as "average session length". These must be accompanied by a technical description how a metric like a "session" is defined (e.g., timeout after idle time) [1] (report under item 6a).

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "Future research should focus on assessing a more tailored and interactive web-based e-learning platforms for brief MI, since it was not the case in the present study and scientific literature supports efficacy of such features [29]. Relative to the tailoring of the platform, researchers should develop an algorithm taking into account each participant's knowledge and specific needs. For instance, some participants asked for more content, as others were satisfied by what was provided in MOTIV@CŒUR. By doing so, researchers could ensure every

20) Trial limitations, addressing sources of potential bias, imprecision, and, if relevant, multiplicity of analyses

20-i) Typical limitations in ehealth trials

Typical limitations in ehealth trials: Participants in ehealth trials are rarely blinded. Ehealth trials often look at a multiplicity of outcomes, increasing risk for a Type I error. Discuss biases due to non-use of the intervention/usability issues, biases through informed consent procedures, unexpected events.

scores and affect knowledge acquisition and clinical outcomes.

Not all participants enrolled in the study ultimately used MOTIV@CŒUR for training in brief MI, as 3 individuals dropped out before beginning the training. However, the global participation rate in the study was superior to those was observed in similar studies. Indeed, 28 of the 31 participants (90%) used MOTIV@CŒUR, and this proportion ranged from 82% to 89% in other studies [61-64]".

21) Generalisability (external validity, applicability) of the trial findings

NPT: External validity of the trial findings according to the intervention, comparators, patients, and care providers or centers involved in the trial

21-i) Generalizability to other populations

Generalizability to other populations: In particular, discuss generalizability to a general Internet population, outside of a RCT setting, and general patient population, including applicability of the study results for other organizations

Does your paper address subitem 21-i?

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "While our study included cardiovascular nurses, it is possible that other healthcare practitioners could benefit from the training".	

21-ii) Discuss if there were elements in the RCT that would be different in a routine application

setting

Discuss if there were elements in the RCT that would be different in a routine application setting (e.g., prompts/reminders, more human involvement, training sessions or other co-interventions) and what impact the omission of these elements could have on use, adoption, or outcomes if the intervention is applied outside of a RCT setting.

ot applicable.	

OTHER INFORMATION

23) Registration number and name of trial registry

Does your paper address CONSORT subitem 23? *

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "Trial Registration: International Standard Randomized Controlled 1	Tria
Registry: ISRCTN16510888; http://www.isrctn.com/ISRCTN16510888	
(Archived by WebCite at http://www.webcitation.org/6hsU142vZ)".	

24) Where the full trial protocol can be accessed, if available

Does your paper address CONSORT subitem 24? *

Cite a Multimedia Appendix, other reference, or copy and paste relevant sections from the manuscript

(include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "Trial Registration: International Standard Randomized Controlled Trial Registry: ISRCTN16510888; http://www.isrctn.com/ISRCTN16510888 (Archived by WebCite at http://www.webcitation.org/6hsU142vZ)".

25) Sources of funding and other support (such as supply of drugs), role of funders

Does your paper address CONSORT subitem 25? *

Copy and paste relevant sections from the manuscript (include quotes in quotation marks "like this" to indicate direct quotes from your manuscript), or elaborate on this item by providing additional information not in the ms, or briefly explain why the item is not applicable/relevant for your study

Yes, "The authors would like to thank the Canadian Institutes for Health Research; Quebec Ministry of Higher Education, Research, Science and Technology; Montreal Heart Institute (MHI) Research Center and Foundation of the MHI; and the Faculty of Nursing at the University of Montreal for their financial support".

X27) Conflicts of Interest (not a CONSORT item)

X27-i) State the relation of the study team towards the system being evaluated

In addition to the usual declaration of interests (financial or otherwise), also state the relation of the study team towards the system being evaluated, i.e., state if the authors/evaluators are distinct from or identical with the developers/sponsors of the intervention.

Does your paper address subitem X27-i?

Yes, "Conflicts of Interest MOTIV@CŒUR is owned by the authors of this study".
About the CONSORT EHEALTH checklist
As a result of using this checklist, did you make changes in your manuscript? *
O yes, major changes
• yes, minor changes
○ no
What were the most important changes you made as a result of using this checklist?
Changes to the abstract to include more details on participant recruitment and intervention content.
How much time did you spend on going through the checklist INCLUDING making changes in your manuscript *
Approximately 2 hours.
As a result of using this checklist, do you think your manuscript has improved? * • yes
O no
Other:
Would you like to become involved in the CONSORT EHEALTH group? This would involve for example becoming involved in participating in a workshop and writing an "Explanation and Elaboration" document
• yes
○ no
